

Source panel

Put uploaded files, generated files and citations in one evidence panel.

Problem and boundary

Public contract

Working integration

@epam/ai-dial-source-panel

When this library is useful

Put uploaded files, generated files and citations in one evidence panel.

01

Find evidence

Inspect source material
beside the conversation.

02

Search by name

Narrow attachments
and source labels.

03

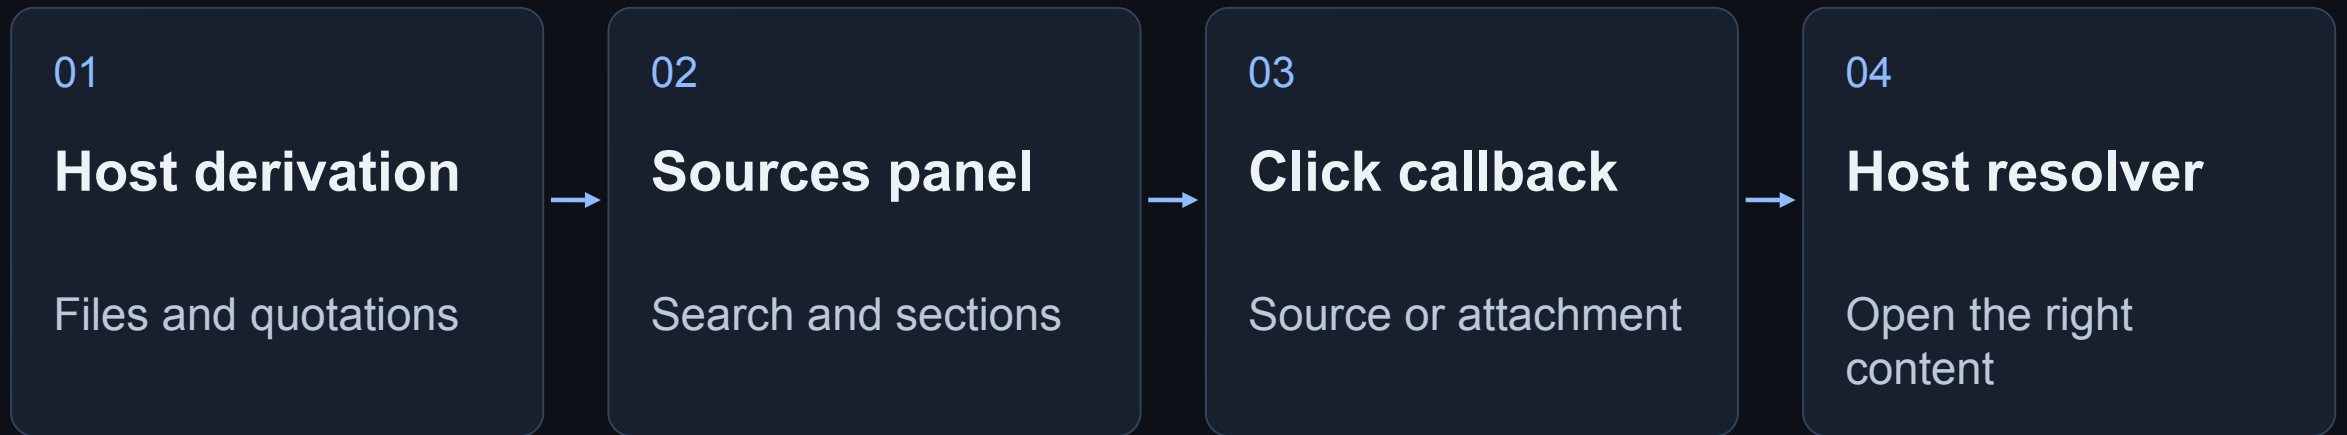

Open a reference

Delegate preview or
download to the host.

Follow the ownership boundary

Inputs and effects stay explicit.

Library: Evidence sections, filtering and attachment/source interactions.

The public contract to start with

ConversationSourcesPanel · selected surface; full API index is in the bundle.

Input or operation	Contract
uploaded	DisplayAttachment[]
generated	DisplayAttachment[]
sources	QuotationSource[]
onSourceClick (optional)	((source: QuotationSource) => void)

A minimal workspace integration

TypeScript / React example · imports and host setup abridged.

```
<ConversationSourcesPanel
  isOpen isMobile={false}
  onClose={onClose}
  uploaded={[]} generated={[]}
  sources={sources}
  labels={labels}
  onSourceClick={onOpen}
/>
```

Full example: [examples/source-panel.tsx](#) · uses [@epam/ai-dial-source-panel](#)

Wire a realistic host workflow

Keep source panel focused on its public responsibility.

01

Group the evidence

Supply uploaded, generated and source records.

02

Open the panel

The host controls open state and mobile presentation.

03

Handle a source click

Resolve the selected item and open its host-owned preview.

Available customization

01

Separate collections

uploaded, generated and sources retain their distinct roles.

02

Panel customization

Width bounds, labels and additionalSections are explicit inputs.

03

Matched text

Search results use the shared highlighting convention.

Find the integration and its checks

Existing tests are evidence of intended behavior; suite results are not claimed.

Evidence	Where to look
Real consumer	chat/components/ConversationSourcesPanel/ ConversationSourcesPanel.tsx
Test evidence	stamps the panel on the desktop layout
Test evidence	renders uploaded attachments

Constraints that affect integration

01

No implicit fetching

Opening a row needs a host callback.

02

Required labels

The panel contract requires the complete labels object.

03

Boundary drift

The README peer list differs from current package composition.
